OSSI-ED Award Criteria 2021

Criterion #1: Leadership in Technology Use

The applicant provides leadership in the use of school-provided open source technologies.

Applicant is a champion and on the forefront of technology integration.

Criterion #2: Innovative Instruction

The applicant regularly uses open source technology tools during class to stimulate discussion and feedback and encourages students to use these tools in presentations to the class.

The applicant asks students to use open source technology to complete assignments, investigate new means of using technology to meet class requirements, and to share those uses with the applicant and class.

Open source technology allows for the performance of tasks that could not have been done without the use of that technology.
The applicant plans student driven instruction integrating the use of open source technology.

Criterion #3: Learning Outcomes

The applicant Integrates varied and authentic opportunities for student use of open source technology into instruction to meet learning outcomes and diverse student needs.

Student outcomes changed significantly based on the open source technology integration.
